Thank you for choosing 4D Server v12 64-bit. This document will provide you some general information about the installation of this particular version of 4D Server and its complimentary parts.

The installation process

4D Server v12 64-bit benefits from a simplified installation process. Simply launch the installer, and you will be prompted to select a language. Once the language is selected and the license agreement is accepted, the installation of the application will begin.

NOTE: If you attempt to install 4D Server v12 64-bit on a 32-bit system a generic Windows message will inform you that the installation has failed.

After running the installation, 4D Server v12 64-bit will be in your Programs folder unless you have specifically designated otherwise.

What's installed?

The installer will provide you with 4D Server v12 64-bit, as well as a plug-ins folder containing 4D Internet Commands 64-bit.

For all other plug-ins, components, templates, and documentation, you must use the standard 32-bit installer for the 4D v12 product line.

Thank you again for choosing 4D v12. We hope your experience is as smooth and easy as the software is powerful. If you have any further questions about 4D and our products, please send us an email at **info@4d.com**.
